| | Vulnerable Structures | None | None | None | Light | Moderate | Mod./Heavy | Heavy | V. Heavy | V. Heavy |

^{*}Estimated exposure only includes population within the map area.

Population Exposure

population per 1 sq. km from Landscan

Structures 5000 Overall, the population in this region resides in 67.2°W 66.5°W structures that are resistant to earthquake shaking, though vulnerable structures exist. The predominant vulnerable building types are mud wall and informal (metal, timber, GI etc.) construction. uadilla **Historical Earthquakes** San Sebastian 18.2°N Caguas 17.6°N PAGER content is automatically generated, and only considers losses due to structural damage.
